DETAILED ACTION

Claims 1-11 are pending in this application.

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11, drawn to the use of mammalian cells transform with nucleotide sequences that encode p53 which function to induce apoptosis.

Group II, claim(s) 1-11, drawn to use of mammalian cells transformed with nucleotide sequences that encode Bcl2 which function to inhibit apoptosis.

The inventions listed as Groups I-II do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: The two inventions each covering claims 1-11 (in part) do not share the same or corresponding technical feature. The invention of Group I requires use of p53 which has an opposite effect from the invention of Group II which requires use of Bcl2. Therefore, neither the components nor the steps are shared between Groups I and II nor is the same technical problem solved.

Applicant is reminded that upon cancellation of claims to a non-elected inventions, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the

Art Unit: 1636

application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
